

QUICK GUIDE

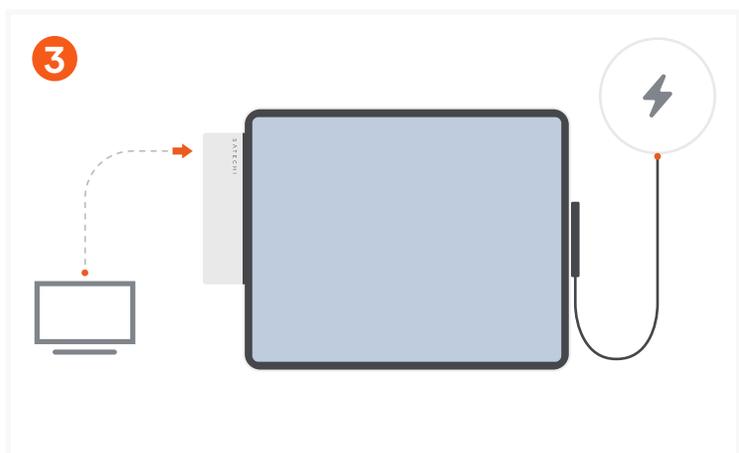

DUAL USB-C HUB FOR SURFACE PRO 9

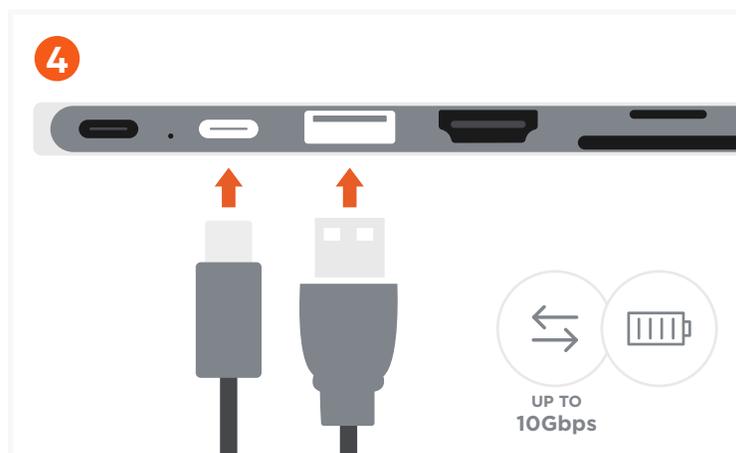

1 Connect the hub into the two Thunderbolt ports on your Surface Pro 9 with the Satechi logo facing towards the screen.

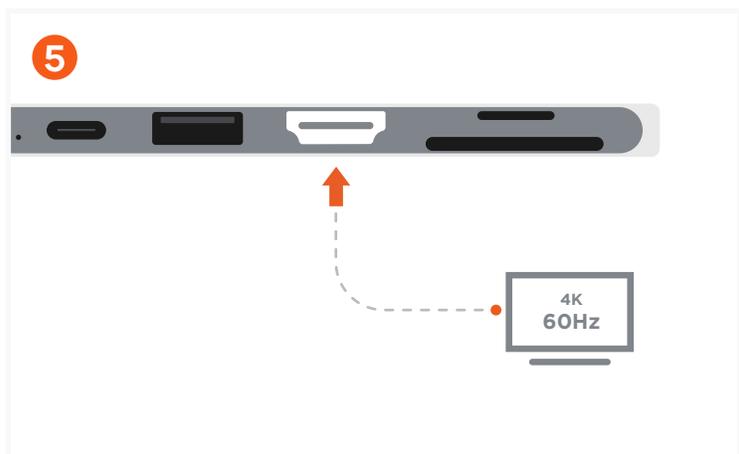

2 Use the USB4 port to charge your device up to 94W, output video up to 6K/60Hz, or transfer data up to 40Gbps.

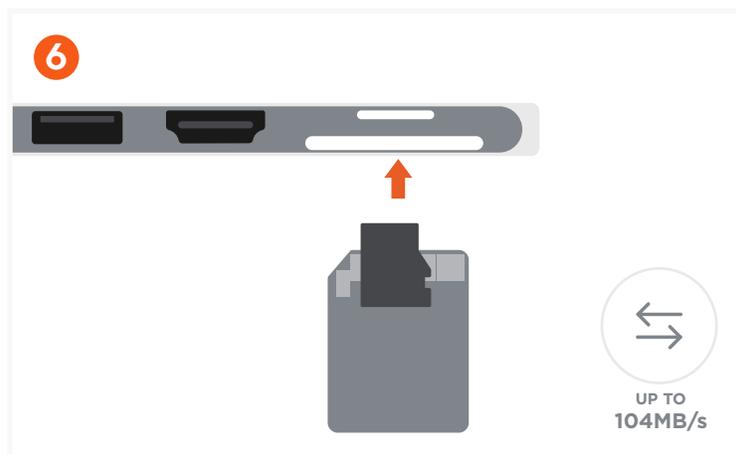

3 When using the USB4 port for video output, it is recommended to use the proprietary charger to keep the Surface Pro 9 charged unless your connected monitor supports charging.

4 Use the USB-C and USB-A ports for fast data transfer speeds - up to 10Gbps
Does not support charging or CD readers including Apple SuperDrive.

5 Use the HDMI port to output up to 4K / 60Hz with an external monitor.

6 Insert microSD or SD cards into the card reader slots.
UHS-I speeds - up to 104MB/s.
Supports synchronous use.
