

QUICK GUIDE

145W USB-C 4-PORT GAN TRAVEL CHARGER

REPLACING OUTLET ADAPTER

1

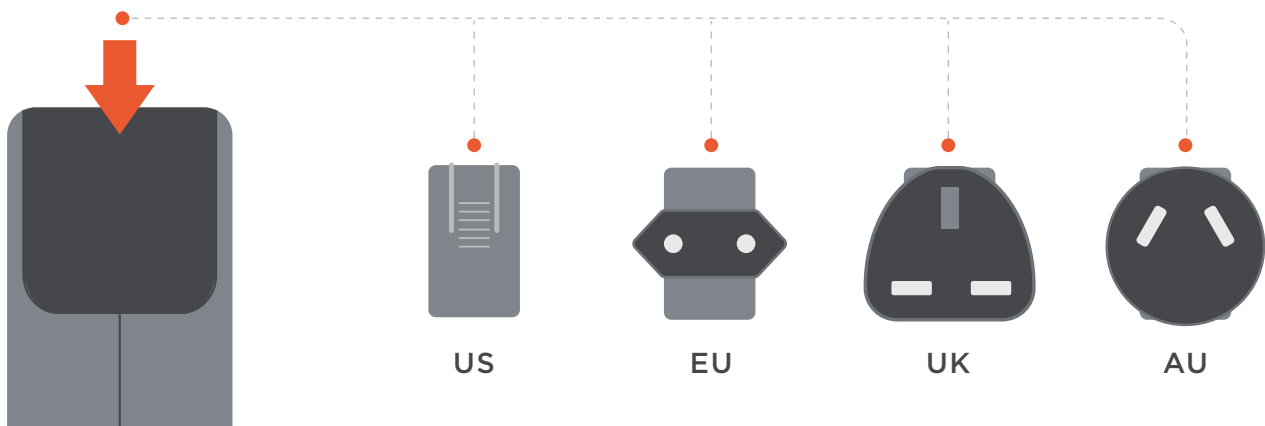

To disconnect the attached outlet adapter slide the switch on the top of the device away from the connector.

2

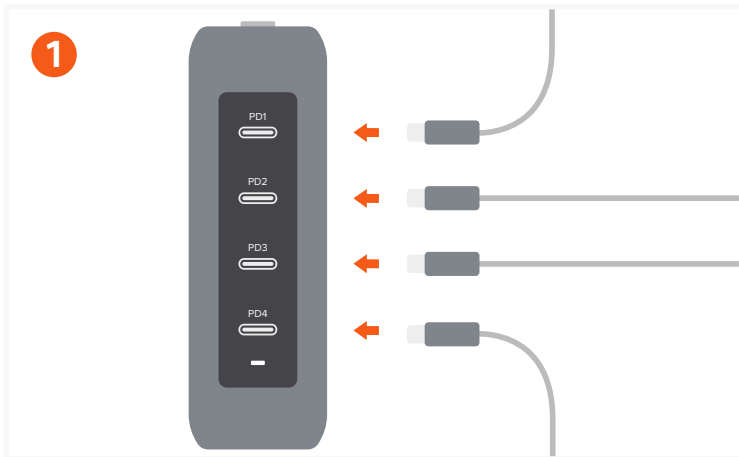

Slide the released outlet adapter up.

4

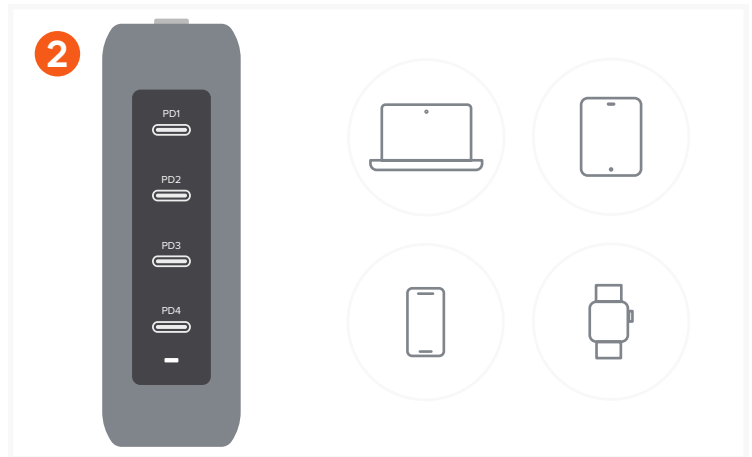

Choose the compatible outlet adapter for your region and slide it in into place.

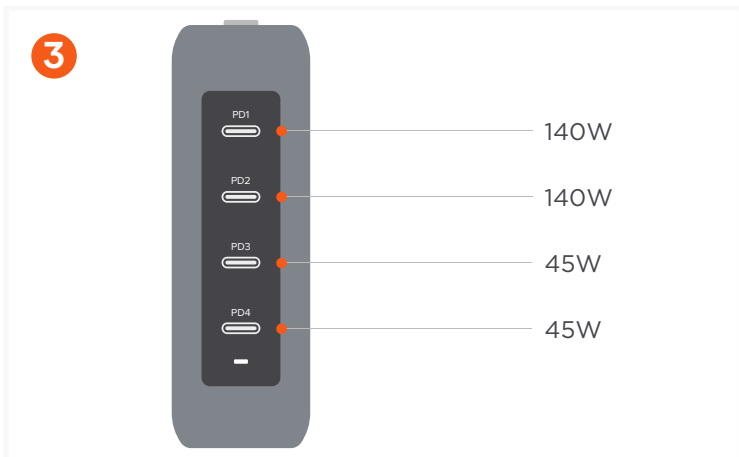

CHARGING YOUR DEVICES

1 Plug in cables (sold separately) to charger's USB-C PD ports.

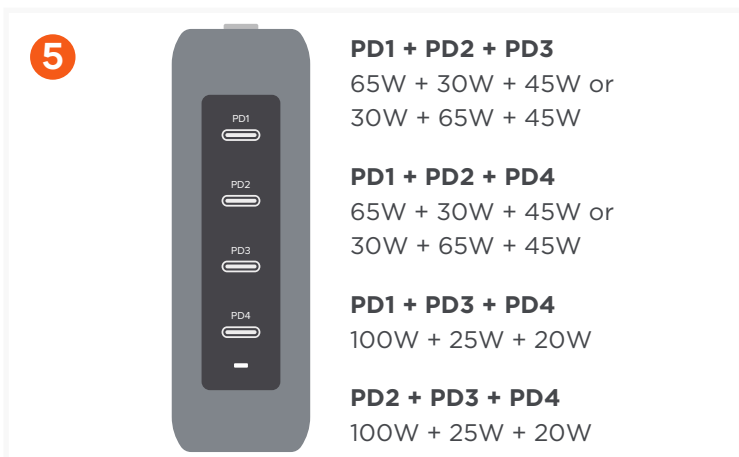

2 Connect and charge up to four USB-C devices at a time. Total max output is 145W

3 Single port connection

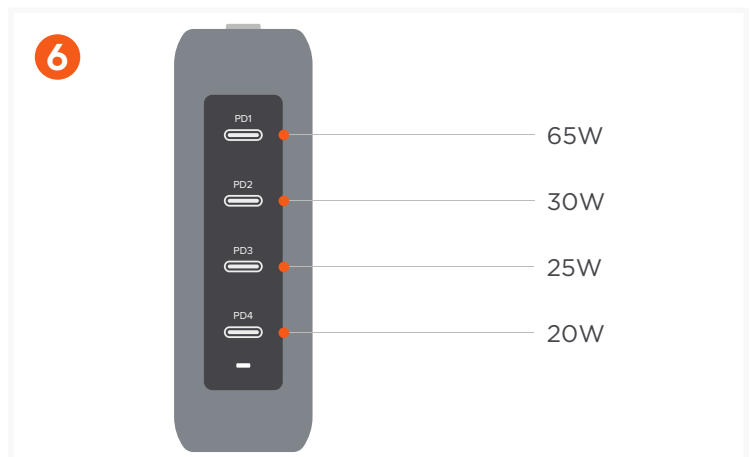

4 Dual port connection

5 Triple port connection

PD1 & PD2 will adjust power output depending on which port the largest device is connected to

6 Four port connection

PD1 & PD2 ports support PD 3.1 @ 140W.

140W charging speed on PD1 or PD2 ports can be achieved only if single port is in use.

Must use compatible MagSafe cable to reach 140W charging speeds.
