Satechi Smart Selfie – Instruction Guide

Please charge the Smart Selfie before using it. To charge:
- Unscrew the cap on the bottom of the Smart Selfie.
- Insert the included micro USB cable into the port on the bottom of the Smart Selfie and insert the other end of the cable into a computer USB port or USB wall adapter.
The LED indicator turns red while charging and turns off when charging is complete. It takes about 1 hour to completely charge the Smart Selfie.

To connect the Smart Selfie to your device via Bluetooth:
- Turn the Smart Selfie on by pressing the Power Button. The LED indicator will turn blue.
- Turn Bluetooth on your iOS or Android device.
- Press the Bluetooth Pairing Button on the Smart Selfie. The blue LED indicator will blink to indicate it's in pairing mode.
- On the Bluetooth list on your device, select the "Satechi Selfie" to complete the pairing process.

To insert your phone onto the Smart Selfie:
- Attach the mount onto the Smart Selfie by screwing it onto the top of the Smart Selfie stick.
- Pull open the padded grips on the mount and insert your phone.

To take a photo using the Smart Selfie:
- Connect the Smart Selfie to your device via Bluetooth (following the above instructions).
- Make sure the LED indicator on the Smart Selfie is set to iOS or Android mode depending on the device you're using to take photos.
- Manually open the camera app on your iOS or Android device.
- Press the photo button on the Smart Selfie to take a photo.

To extend the Smart Selfie pole:
- Grip the handle in one hand and pull the top of the Smart Selfie with the other hand until the desired length is achieved.

The Smart Selfie will go into SleepMode after a period of non-use. To wake the Smart Selfie out of Standby Mode:
- Press the iOS/Android button.
- The Smart Selfie will automatically reconnect via Bluetooth.
- The reconnection is successful when the iOS/Android LED indicator is on.
