

INSTRUCTIONAL GUIDE

WIRELESS KEYBOARD

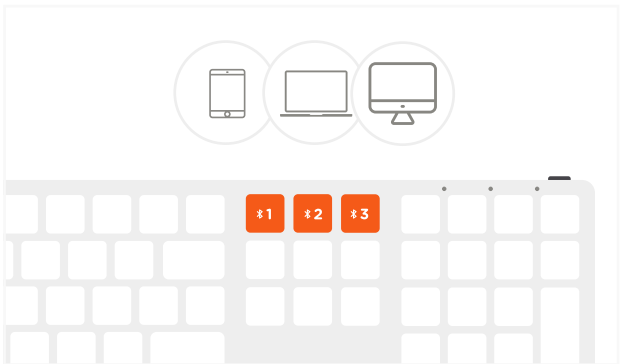

- 1 Turn on your Wireless Keyboard.
The power indicator light should turn green for ~3 seconds, then turn off.

- 2 To assign a Bluetooth device, press and hold one of the keyboard's Bluetooth buttons for ~3 seconds until blue LED light is flashing. You can assign up to 3 Bluetooth devices.

- 3 On the host device, look for "Satechi Bluetooth Keyboard" and connect to pair. The blue LED light will stop blinking, indicating a successful pairing.

- 4 To toggle between connected Bluetooth devices, press Bluetooth 1, 2, or 3 button. To remove saved Bluetooth device, press Fn + Shift (left) + Delete.

- 5 The power indicator light will flash green when battery is low. Plug in charging cable into keyboard's USB-C port and connect to a powered USB port. Allow 2-3 hours for a full charge or until red LED light turns off.

- 6 The keyboard will go into sleep mode after ~30 minutes of inactivity. Press any key to wake up.
