

INSTRUCTIONAL GUIDE

PRO HUB MINI ADAPTER

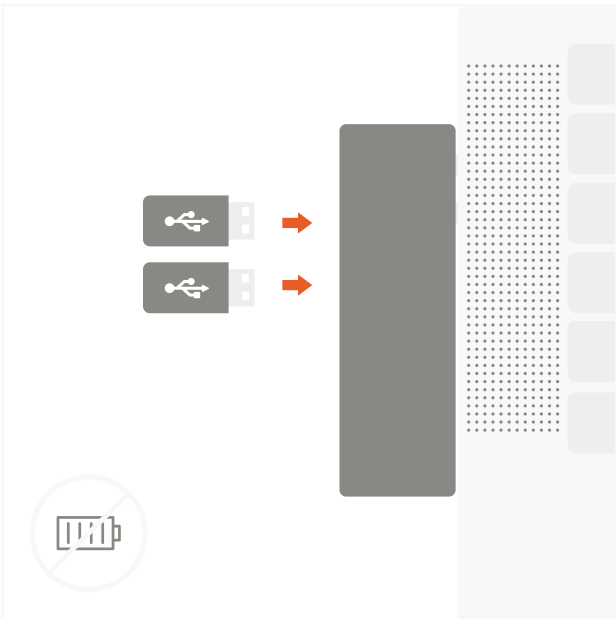

- 1 Connect the Hub into Thunderbolt ports of your MacBook.

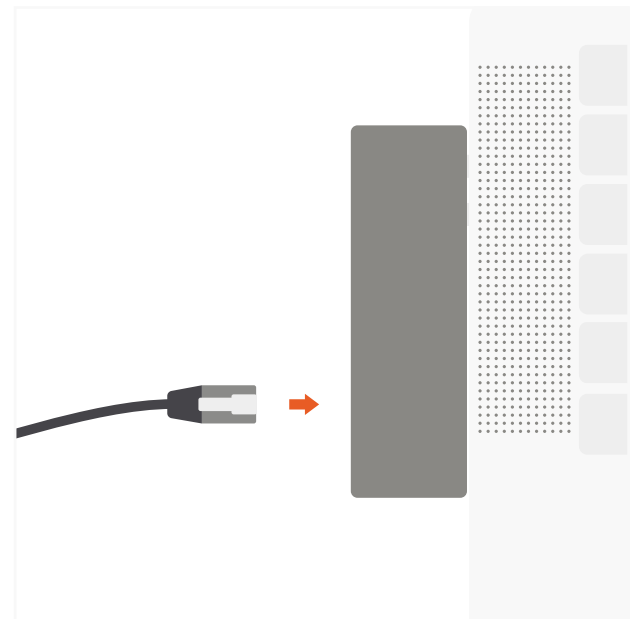

- 2 Use the USB4 port to charge your device up to 100W, up to 5K 60Hz display output, and up to 40 Gbps data transfer.

- 3 Use two USB-A data ports to connect two USB devices up to 5Gbps. Does not support charging or CD readers, including Apple SuperDrive

- 4 Connect an RJ45 network cable to the adapter's Gigabit Ethernet port.

- !** The MagSafe 3 port of MacBook Pro 16 charges will charge up to 140W while the USB4 port will support up to 100. To reach 5K video output, you will need to use a computer, thunderbolt cable, and monitor that supports 5K.
