

## 7-PORT CHARGING STATION with 2x TYPE-C PORTS

USER MANUAL

## CHARGE YOUR DEVICES

Thanks for purchasing the Satechi 7-Port Charging Station with 2x Type-C Ports! Use the five Type-A USB ports to charge smartphones, tablets, and other USB-chargeable devices. Or use the two Type-C ports to charge any Type-C chargeable devices. The Charging Station is perfect for charging almost any device thanks to its built-in smart charging chipset and per-port surge protection.

## HOW TO OPERATE

To set up the Charging Station, plug the power supply into the Station's power input. Then, plug the power cable into the supply and into a power outlet.

Press the Charging Station's power button to power it on, and connect your devices to the Station's ports with their respective charging cables. We recommend using cables that were included with your device, or cables certified by your device's manufacturer.

### FCC ID :

This device complies with part 15 of the FCC results. Operation is subject to the following two conditions:  
**1.** This device may not cause harmful interference and  
**2.** This device must accept any interference received, including interference that may cause undesired operation.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- 1.1. Reorient or relocate the receiving antenna
- 1.2. Increase the separation between the equipment and receiver
- 1.3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- 1.4. Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the manufacturer could void the user's authority operate the equipment.
