

Multimedia Adapter – Video Output Firmware Update Instruction

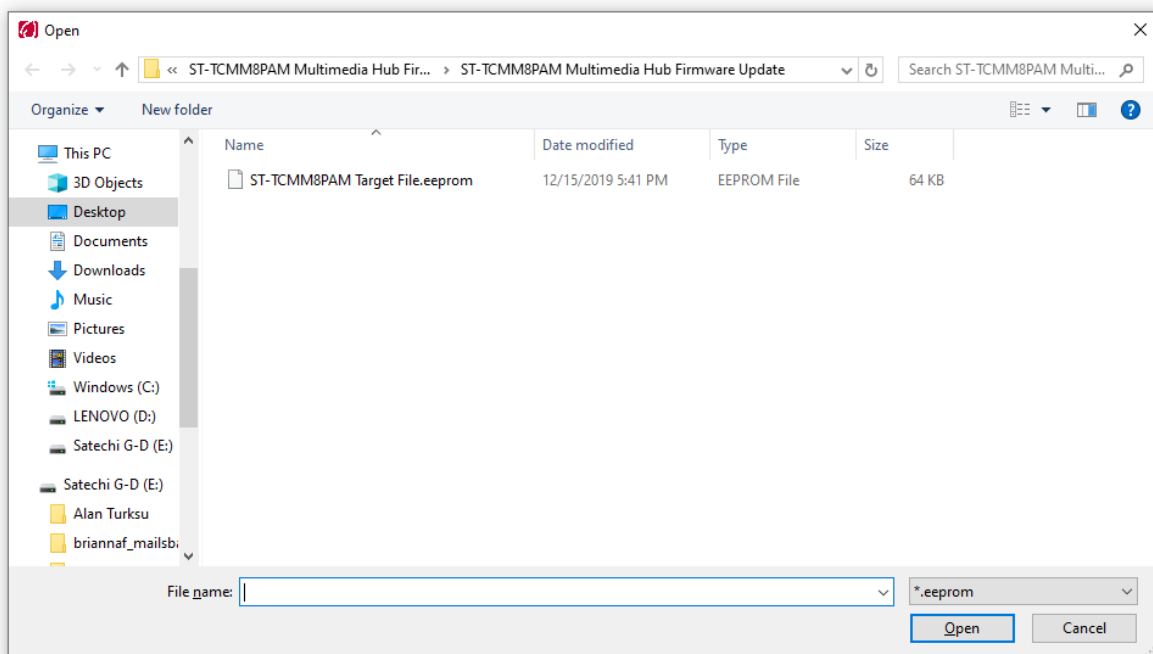

Preparation:

- Connect Multimedia Adapter to Windows 10 PC via USB-C and to external monitor via HDMI and have pass-through power connected.

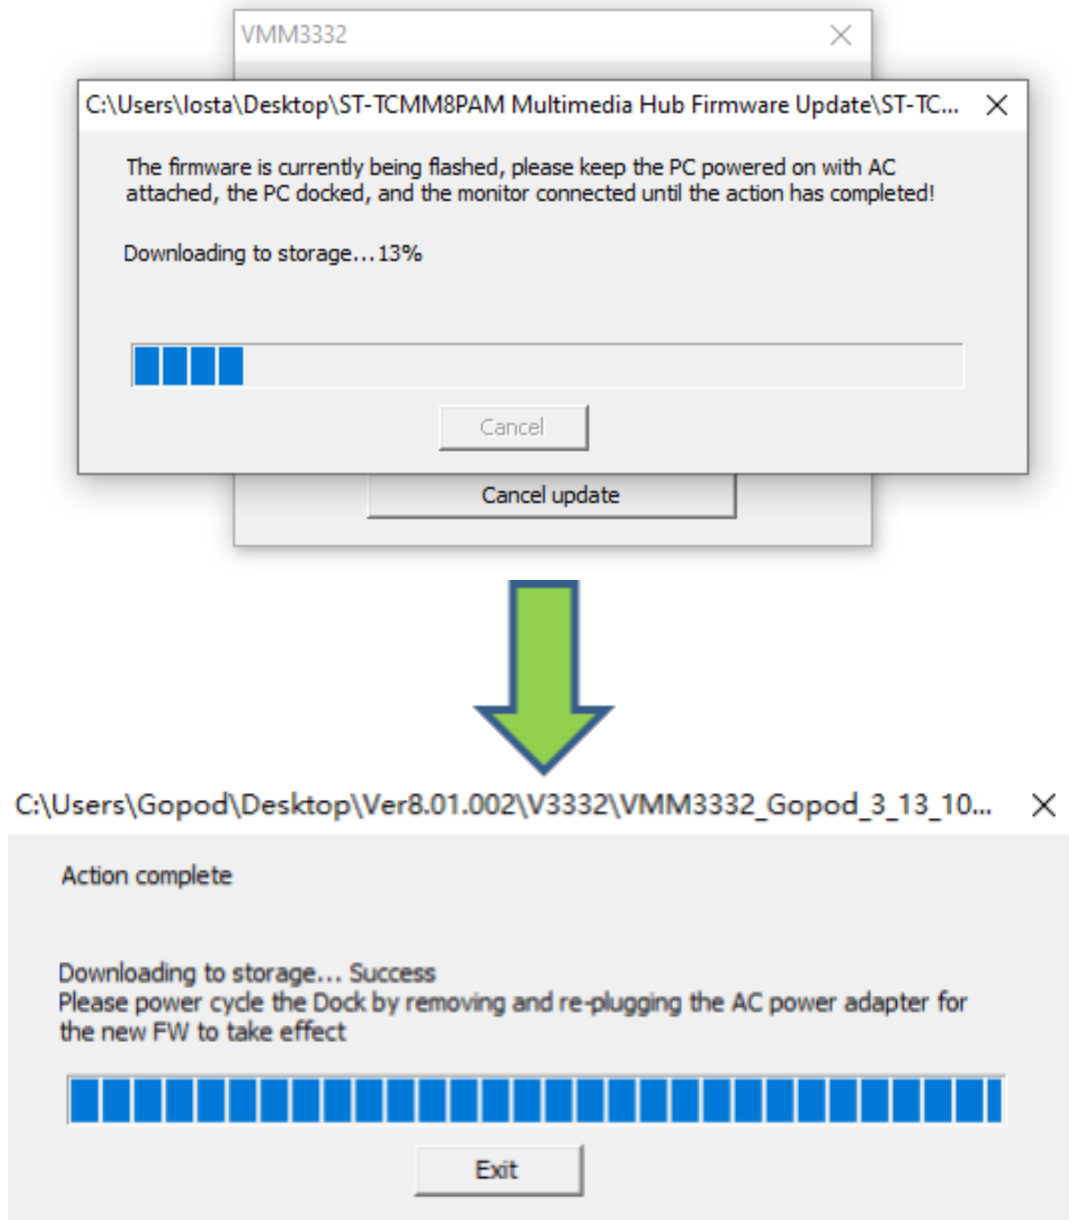

Step 1. Copy “VmmUpdater.exe” to desktop and open software; select “Update firmware”.

Step 2. Choose the “ST-TCMM8PAM target file”, click "Open".

Step 3. Update automatically begins

Step 5. Unplug the hub adapter, re-connect it to the notebook and test the function.

Note: If the update failed during the updating process, pls unplug all the devices, re-connect & re-do the firmware update.
